B2N Your 3D Partner

ABOUT US:

B2N is a main distributor of 3D printing and 3D scanning technologies in South East Europe with an expanding network of local resellers. The Bulgarian company has two showrooms offering different printing technologies and on demand service for scanning, printing, modelling and product development. B2N with its certified team is an activist in promoting and educating the general public and the professional sector about 3D technologies and their various applications in fields like the automotive industry, engineering, medicine, architecture, product and jewellery design and many more.

we are honored to represent:

mcor technologies
certified reseller
Bulgaria, Serbia, Croatia, Slovenia, Hungary, Slovakia

Ultimaker
sales partner for Bulgaria, Greece, Romania, Serbia, Macedonia,
Croatia, Slovenia, B&H, Albania, Montenegro, Cyprus

ABOUT:

Additive Days is a new two-day show organized by **B2N** - a Bulgarian based company distributing and representing leading manufacturers in 3D printing from around the world. The event is focused on the fast growing sector of additive manufacturing technologies and their multifaceted applications in sectors like medicine, industrial design, aviation and many more. **Additive manufacturing** allows for the creation of extraordinary solutions in out-of-the-ordinary situations, and for the building of new products with entirely new properties, which are lighter, stronger and less wasteful.

03-05 NOV 2016**

GOAL:

Additive Days aims to create a propitious occasion for a meeting between manufacturers, distributors, consumers and technology fans from Bulgaria and the region. The event aims to show new trends and their intervention in various sectors, to make an overview of the most important developments in 3D printing, to demonstrate the latest developments by selected leading brands and their machines and products, and involves the audience in an inspiring dialogue.

FORMATS:

CONFERENCE – hear about the latest trends and technologies alongside practical case studies.

WORKSHOPS – choose from several one-day workshops created especially for the event by experts from Bulgaria and the region.

DEMO SPACES – See and experiment how the latest 3D printing innovations are changing the way we work. The demo space covers everything from design and prototyping to manufacturing. This is the best place to launch and promote products, meet, show and sell products.

And more: exhibitions, kids workshops, opening party, lounge area.
